

Categories of Materials

General Reagents

- Do not require specialized equipment or expertise
- Plasmids, Recombinant Proteins, Monoclonal Antibodies and Cell Lines, Tn Mutants, Clinical Isolates
- Housed, replenished, and distributed by BEI

Specialized Reagents

High Yield Reagents

- Produced in quantities large enough to allow deposit
- Crude Fractions, DNA, Polyclonal Antibodies
- Replenished by CSU, distributed by BEI

Low Yield/High Demand Reagents

- Requiring frequent or constant production to meet demand
- Purified Products
- Replenished by CSU, requests made through BEI and shipped directly from CSU
