

## Summer Fellowships in Laboratory Animal Medicine

The American Society of Laboratory Animal Practitioners along with several funding partners is supporting 10-16 week Summer Fellowships in Laboratory Animal Medicine.

Are you interested in clinical veterinary medicine AND research? Do you want to work with a variety of non-traditional species? Are you curious about cutting edge science that defines the human and animal biomedical fields? If you are, then LABORATORY ANIMAL MEDICINE is the career for you, we can help you explore, AND pay you to do so! Activities in these programs will include practice of clinical medicine in a research environment, diagnostic and research pathology of laboratory animals, surgery, animal colony management, working closely with laboratory animal veterinarians and residents, participation in journal clubs, seminars and management teams, regulatory oversight of animals used in research, laboratory animal medicine research and a number of other exciting endeavors.

Program structures, activities, deadlines, fellow numbers and application requirements vary so you can surely find a program that fits your goals. Please review the program web sites for more information. Participating programs and their sponsorships are:
